

esm_dis_bin

Points: observed (4000 of 7726 shown). 0% fall outside the 95% region (orange); about 5

Shaded: where the model puts 50, 80 and 95% of its predictive mass, from 200 draws. Points: the ob
data, orange outside the 95% region. A systematic drift of the points off the regions means the trend
wrong; regions much wider or narrower than the scatter mean the variance is.
