

esm_psx_bin, lag 1

Points: observed (4000 of 4999 shown). 1% fall outside the 95% region (orange); about 5%

Rate of change against time, plotted at the midpoint of each interval and shaded by the 50, 80 and 95 predictive regions. A scatter that widens or narrows over time while the regions do not points at the diffusion rather than the drift.
